

Malak Mohamed Abd-ElHamid

Junior AI Engineer

Tel.: 01557414505 || Addr: Cairo, Egypt

[LinkedIn](#) || [GitHub](#) || [Email](#)

Professional Summary

Artificial Intelligence graduate with hands-on experience in Machine Learning, Deep Learning, Computer Vision, and NLP. Experienced in developing AI-powered applications using Python. Seeking a Junior AI Engineer or Machine Learning Engineer role.

Education

Bachelor of Technology in Artificial Intelligence, University of Helwan International Technological (2022 – 2026)

Experience

- **Machine Learning Intern – Digital Egypt Pioneers Initiative**, MCIT (Jun 2025 – Dec 2025)

- Selected to join a national internship program focused on Machine Learning and future digital skills.
- Participating in hands-on technical labs focused on machine learning and data processing.
- Attending sessions on soft skills, freelancing, and professional English communication.

- **Commercial International Bank (CIB)**, Ai & Business Training Program (Sep2024 – Oct2024)

- Completed certified training in:
 - Digital Transformation & Data Literacy
 - Financial Literacy & Entrepreneurial Skills
 - Human-Centric Interpersonal Skills
 - Emerging Talent for the Future Workplace

Courses

- **Applied Deep Learning**, MaharaTech (Jun 2025)

- **AI & ML with Quantum Computing Foundations**, Ministry of Youth & Sports | YTA & Huawei (Mar 2025)

Skills

Technical Skills:

Programming:

Python

Artificial Intelligence:

Machine Learning, Deep Learning, Computer Vision, NLP

Backend:

FastAPI

Database:

SQL, MySQL

Tools:

Git, GitHub, VS Code, Microsoft Office, AI-Assisted Development

Soft Skills:

Communication, Teamwork, Fast Learner, Flexible and adaptable

Languages:

Arabic: Native, English: Very Good

Projects

- **EyeSpeak – AI-Based Eye Tracking System**, Graduation Project

Developed an AI-powered eye tracking system for hands-free interaction using Computer Vision and Machine Learning.

Tools: Python, OpenCV, Random Forest, Raspberry Pi Zero 2 W, Android, IoT

Results: Achieved 87% gaze estimation accuracy and integrated the system with Android and IoT devices for real-time interaction.

- **VisionWalk (Real-Time Pedestrian Detection)**, Ministry of Youth & Sports | YTA & Huawei project

Developed a real-time pedestrian detection system using YOLOv5.

Tools: YOLOv5, Python, Caltech Pedestrian Dataset

Results: Achieved 80% detection accuracy in practical testing through model training and evaluation

- **Smart Gloves for Sign Language Translation**

Developed a wearable sign language translation system using Random Forest.

Tools: Python, Machine Learning (Random Forest), Sensor Integration

Results: Achieved 87% translation accuracy and reduced error rate by 20%

Activities

- **Director** — Enactus HITU (Sep 2024 – Mar 2025)

- **Volunteer** — Ressala Charity Organization (Sep 2022 – Sep 2023)
